**FOR IMMEDIATE RELEASE****THE ENERGY AUTHORITY SELECTS HENWOOD'S ON-LINE MARKET INTELLIGENCE DATA APPLICATIONS FOR HELP IN SUPPLYING STRATEGIC ANALYSIS SERVICES**

March 8, 2002

Jacksonville, Fla. – The Energy Authority Inc. has selected the new online market intelligence data applications from Henwood to help supply strategic analysis services to its members and partners, the company announced today.

"Access to timely information is vital to the power marketing services we provide for our members and partners," said Andy Thompson, manager of new products and services at TEA. "Henwood's new online market intelligence applications are easy to use and quite useful for our team. We're excited about adding these products to our resources for supplying strategic analysis services," Thompson said.

"We are very pleased to add TEA to the growing list of subscribers who use our online market intelligence products," said Mark Henwood, president and CEO of Henwood Energy Services Inc. "Our mission for serving the data needs of the energy industry remains simple: provide easy to use web-delivery of accurate and timely power market intelligence that enhances our customers' competitive positioning and analytical capabilities."

Henwood's on-line products provide access to information combined with analytics that was previously unavailable to the energy marketplace. **NextGen™** allows **TEA** to comprehensively track the progress of new generation units entering the power markets through an easy to use database which is updated daily by Henwood's dedicated market intelligence staff. **GenSpy™** provides users with detailed reports, graphs, and maps that review generator characteristics, benchmark generation assets against competitors, and conduct profitability analysis scenarios. **GenReporter™** provides actual hourly plant operation data including generation output, fuel consumption and emissions allowing TEA to use the data for portfolio management. All products provide instant access to data in tabular or chart format without any software to install or database to maintain, and are available on a subscription basis to registered users.

About Henwood: Henwood offers power generators, marketers, and retailers integrated EnerPrise™ Software solutions, comprehensive market intelligence data and information, and strategic consulting services to meet the challenges of restructured energy markets throughout North America, AustralAsia, and Europe. For more information why the top power generators rely on Henwood, call Tom O'Meara at 916/569-0985, (e-mail tomeara@hesinet.com) or visit www.henwoodenergy.com.

About The Energy Authority: The Energy Authority is a not-for-profit energy-marketing corporation headquartered in Jacksonville, Fla. TEA currently manages 16,000 MW of generation and purchased power assets, and is owned by six public power entities: JEA, formerly the Jacksonville Electric Authority; MEAG Power, the Municipal Electric Authority of Georgia; Santee Cooper, South Carolina's state-owned electric and water utility; Nebraska Public Power District; Gainesville Regional Utilities and City Utilities of Springfield, Mo.
